

FILLING THE GAPS IN SAFETY

RetroSTEP™ safety panelling is designed specifically to prevent Dropped Objects in your work place. Its patented design fits a wide range of stair designs and has been developed to *AS1657 - 2013 Fixed platforms, walkways, stairways and ladders— design, construction and installation.*

RetroSTEP is quickly installed to your existing stairways barricading areas above and below each set of stairs.

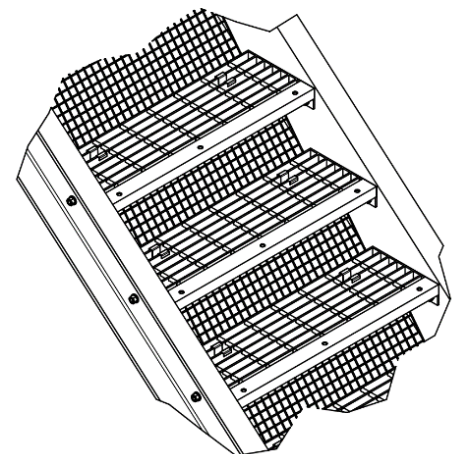

Fast, affordable and easy to install RetroSTEP™ plays an integral part, when combined with RetroGUARD™, in preventing dropped object risks from open stairs and walkways.

RetroSTEP™ has been specifically designed for industrial applications and will provide lasting safety in harsh environments.

RetroSTEP	
ITEM	SPECIFICATION
1	Wire Mesh Panel
	Material Hard Drawn Truform Steel Weld Mesh
	Open Dimensions 25mm x 50mm x 3.15mm
	Finish Hot Dip Galvanised to AS4680 Table 1
	Weight 1.3kg/panel
	Tensile Strength 550-850MPa
2	Stair Tread Clip
	Material Hot Rolled Carbon Steel
	Style RSC-AC325
	Finish Hot Dip Galvanised to AS4680 Table 1
	Weight 0.08kg/panel
3	Hex Washer Head Screw
	Style Screw SDM Hex Class 3
	Size 12Gx14x35 Class 3 AS3566.1
	Weight 0.6kg/100

FEATURES

- Safer working environment
- FAST, SAFE & easy to install
- Economical
- Flexible mesh panel design
- Retro fitted to existing stair treads
- No drafting required
- No site surface preparation
- No Site welding or hot works

RetroSTEP™ provides complete coverage for each of your stair openings.
